

Consumer Price Index (ABS Cat No 6401.0)

Latest quarter: September quarter 2017

Release date: 25 October 2017

Next release date: 31 January 2018

Australian estimates of the CPI refer to the weighted average of Australia's eight capital cities.

Quarterly and annual movements

The Hobart CPI was estimated to have increased by 0.3 per cent in the September quarter 2017 and was 2.0 per cent higher than the price index in the corresponding quarter one year earlier. Nationally, the CPI was estimated to have increased by 0.6 per cent in the September quarter 2017 and was 1.8 per cent higher than the same quarter in the previous year.

CPI analytical measures

The CPI is a key indicator considered by the RBA when determining the official cash rate, given the RBA's target of maintaining national inflation within a band of two to three per cent over the economic cycle.

The RBA analytical measures of CPI growth at the national level (Table 2) show that the average of the two published measures of core inflation is below the RBA's target inflation band of two to three per cent on an annual basis.

From the December quarter 2007 to the March quarter 2010, this average measure, for each quarter, was above the RBA's target band, but decreased to be within the target band between the June quarter 2010 and the December quarter 2015.

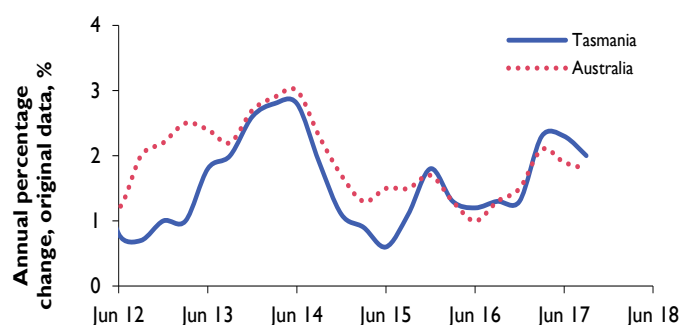

While the average analytical measure has remained below the target band in annual terms since the first quarter of 2016, the measure has since strengthened and was 1.9 per cent in the September quarter 2017 (Table 2).

Table 1: Percentage change of CPI by capital city, September quarter 2017, original data

Original data	Qtrly % change	Annual % change	Year average % change
Sydney	0.7	1.9	2.1
Melbourne	0.5	2.2	2.1
Brisbane	0.4	1.5	1.7
Adelaide	1.1	1.8	1.7
Perth	0.5	0.8	0.7
Hobart	0.3	2.0	2.0
Darwin	0.6	0.6	0.3
Canberra	0.9	2.1	2.1
Australia	0.6	1.8	1.8

Consumer Price Index (ABS Cat No 6401.0)

Latest quarter: September quarter 2017

CPI components

Over the past year, declines were recorded in the communications, food and clothing and footwear components of Hobart CPI, while all other components of Hobart CPI increased, with alcohol and tobacco, health, transport and education recording the strongest increases.

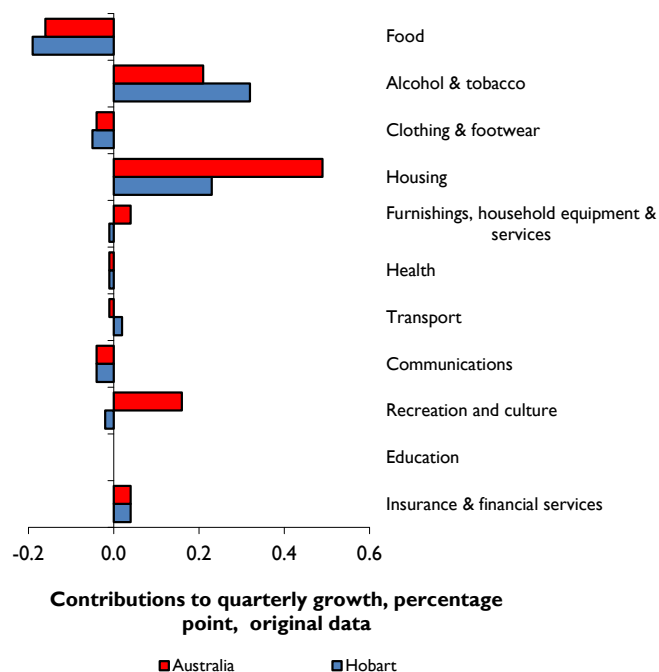

The large increases and decreases in components of Hobart CPI were largely echoed in changes in the national CPI through the year to the September quarter 2017.

Table 3: Annual percentage change in CPI components, Hobart and Australia, September quarter 2017, original data

Original data	Hobart	Australia
Food	-1.2	-0.7
Alcohol and tobacco	7.6	7.0
Clothing and footwear	-0.6	-3.2
Housing	2.3	3.3
Furnishings, household equip. and services	0.2	-0.8
Health	4.5	3.9
Transport	3.9	2.7
Communications	-3.5	-2.9
Recreation and culture	1.1	0.6
Education	3.1	3.1
Insurance and financial services	1.3	1.8
All groups	2.0	1.8
