

<b>Treasurer's Instruction No</b>	<b>1210</b>
Title	<b>Evaluating Major Works Tenders: building and construction/roads and bridges</b>
Effective date	<b>1 December 2014</b>
Objective and Background	<b>Provides instructions on the procedures that agencies must follow when evaluating major works building and construction/roads and bridges tenders.</b>
Version Number	<b>5</b>

*Black letter (or bold) items within these Instructions are mandatory and other plain font items are instructional or for the purpose of providing guidance only.*

- (1) This Instruction applies to the procurement of building and construction and roads and bridges and is to be read in conjunction with other Instructions relating to such procurements which are contained in the 1200 series of the Treasurer's Instructions.**

Further information on building and construction procurement, including a definition of "building and construction" and "roads and bridges" and information on the types of services that fall under these categories is located at [www.purchasing.tas.gov.au](http://www.purchasing.tas.gov.au) > [Buying for Government](#).

For information in relation to procurement of goods and non-construction related services, refer to the 1100 series of the Treasurer's Instructions.

As far as practicable, the person who carries out the evaluation should be either the person who prepared or was responsible for preparation of the tender documents or the person who is to administer the contract.

A technical review of all tenders should be undertaken even if it is a simple lump sum contract and a compliant tender, within funding approvals.

- (2) Tenders must be fairly and equitably evaluated in a manner that is consistent with the Government's procurement principles. The final decision must be able to withstand public scrutiny.**

The Government's building and construction and roads and bridges procurement principles are contained in Instruction 1201.

- (3) Agencies must ensure that all tenders are evaluated in accordance with the evaluation criteria and methodology outlined in the tender documentation.**

The tender assessments will generally be:

- by lump sum lowest tender; or

- in accordance with Treasury's *Guidelines for Tender Evaluation Using Weighted Criteria*.

It is highly recommended that the Weighted Attribute Methodology be used for building and construction projects, wherever possible. Further information on the Weighted Attributed Methodology is available from the *Guidelines on Tender Evaluation using Weighted Criteria for Building Works and Services* which is located at [www.purchasing.tas.gov.au](http://www.purchasing.tas.gov.au) > [Buying for Government](#) > [Resources](#) > [Publications](#).

**(4) For roads and bridges projects, agencies must ensure that the Weighted Attribute Methodology is used.**

For information regarding the Weighted Attribute Methodology used for roads and bridges projects please contact the Department of State Growth.

## **TENDER COMPARED TO ESTIMATE**

**(5) Where the lowest conforming tender is 10 per cent below or above the estimate, an agency must:**

- (a) check the tender estimate and reconcile the estimate with the tenderer's price and with that of other tenderers;**
- (b) where, following a review of the estimate, the preferred tenderer's price is 10 per cent or more under the estimate, request the tenderer to confirm in writing that the nature and the value of the contract is fully understood, that the price properly reflects all the contractual obligations and that they remain satisfied that the tender price is correct; and**
- (c) where, following review of the estimate, the preferred tenderer's price is 10 per cent or more over the estimate, ensure that the preferred tenderer is registered within the required prequalification threshold.**

The tenderer should not to be made aware of the agency's estimate or other tenderers' prices. An agency may need to refer back to the quantity estimator when considerable variations have occurred.

## **REVIEW OF SCHEDULES /ADDENDA**

**(6) Where tenderers are required to submit various schedules either with their tenders or when requested by the Principal, a review of all these schedules must be carried out to ascertain whether or not they are in conformity with the tender documents.**

Technical schedules or technical data submitted by tenderers may need to be reviewed to determine whether they are in accordance with the tender requirements.

- (7) Agencies must ensure that acknowledgment of any issued addenda has been provided with the tenderer's submission and that this acknowledgement is signed and states that the tender response allows for all addenda issued for that tender.**
