You don't often get email from [REDACTED] [Learn why this is important](#)

There is a way around it by people or criminals getting friends or gang members friends to get a card and share them around. In their hundreds.

Cards need a photo on them and the machine would need capability to check photo against the players face. That capability is not expensive to do. If machine in doubt it can send a message to venue to go to machine and check the persons id, it should also send message to regulatory authority who can then gather whats happening in real time.
