CareSuper feedback – Government Business Governance Reform Draft Plan

Dear Deputy Premier

Thank you for the opportunity to attend the Business and Industry Roundtable held in Launceston on 5 November 2024. We appreciate the chance to provide our feedback on the proposal.

As highlighted during the roundtable, CareSuper has been a long-standing and committed part of the Tasmanian community, through our workforce, our members and employers, and our investments. As an indirect stakeholder in this process, we won't be providing a detailed response, however we continue to share a commitment to the economic prosperity of Tasmania where many of our members live.

As a highly regulated superannuation fund and the custodian of our members' retirement savings, we take our responsibilities seriously. Central to our operations is a commitment to good governance, which we believe is essential for the effective and sustainable functioning of any institution, whether in the public or private sector.

We recognise that the Reform proposal represents a significant and important process for the government, one that will require comprehensive stakeholder and community engagement. We trust the process will enable the government to thoughtfully address these key matters.

Thank you once again for your invitation. We look forward to working constructively with the government to continue delivering positive retirement outcomes for our Tasmanian members.

Kind Regards,

Jason Murray
CEO
